

## EDUCATION

**University of British Columbia**  
M.Sc., Computer Science

Vancouver, BC  
2020-2022 (projected)

- Advisor: Dr. Nicholas Harvey

**B.Sc., Double Major: Honours Computer Science, Major Statistics**

2015-2020

- 4.33/4.33 GPA (Distinction)
- Undergraduate Hons. Thesis: "Restricted-dimension subgradient descent: asymptotic bounds on error", supervised by Dr. Nicholas Harvey

## EXPERIENCE

**Google** Vancouver, BC (Remote) | Software Developer Intern Summer 2020, Summer 2021-

- Designed and implemented unsupervised learning (clustering) algorithms for geospatial data in Google BigQuery as part of the BigQuery GIS team.

Worked with: C++, Google BigQuery

**Google** Mountain View, CA | Software Engineering Intern Summer 2019

- Worked on Google Earth Engine, a data platform provided by Google for geospatial analysis at scale.
- Designed and developed a cloud application allowing users to query Earth Engine assets using the open Web Map Tile Standard.

Worked with: Python, Flask, Google App Engine, Java

**Cockroach Labs** New York, NY | Backend Engineering Intern Summer 2018

- Improved the performance of a class of delete operations by a factor of 1 billion.
- Developed a workload simulator for testing the performance of a geo-distributed CockroachDB cluster.
- Introduced programming language features in CockroachDB for compatibility with PostgreSQL semantics.

Worked with: Go, Git

**Splunk** Vancouver, BC | Software Developer Intern Summer 2017

Worked with: Scala, Python, React.js, PostgreSQL, Docker, Git

**Hootsuite** Vancouver, BC | Software Developer Intern Summer 2015, Summer 2016

Worked with: Scala, React.js, Python, Ruby, Mesos, Docker, Git

## SELECTED PROJECTS

**Direction-of-Voice filter** <https://github.com/AudioMLLab/dov-audio-filter>

- Created an audio filtration application to filter voice audio that is not intended to be heard by using machine learning to eliminate the portion of audio originating from speakers not facing the microphone. Joint work with Abiramy Kuganesan.

**This Pokémon Does Not Exist** [https://github.com/emsalo/pkmn\\_doesnotexist](https://github.com/emsalo/pkmn_doesnotexist)

- Developed a machine learning project in TensorFlow that uses a variational autoencoder to generate novel Pokémon sprites. Entered into nwHacks 2020.

**Twitter Clustering Project** <https://emsal.me/blog/4>

- Conducted a machine learning analysis using Python and Julia.
- Implemented the DBSCAN clustering algorithm on a social network graph structure to identify distinct groups.

**Socksify** <https://github.com/emsalo/Socksify>

- Created a program written in C that allows users to run processes with all outgoing TCP traffic going through a SOCKS5 proxy.

## TECHNICAL SKILLS

- Areas of expertise: Algorithms, Machine Learning, Statistics, Backend Development
- Programming languages: Python, Julia, R, C++, Go, Java, Scala, JavaScript
- Tools: Jupyter, Tensorflow, Flux.jl, PostgreSQL, Git, Perforce, Linux
